

Process Development Engineer

Fantastic Farms is a fast-paced biotechnology-oriented food-tech company, working to change how humanity is making food. Our investors are Strauss group, and world-class investors: CPT capital, Talmon Marco (Founder @ Viber).

Fantastic Farms is a pioneer in the alternative protein landscape, as we are harvesting the power of plants to produce animal proteins and use them to recreate dairy and eggs. We put our hearts, souls, and skills into making a difference for people, animals, and the planet.

This is a new role that requires someone highly-motivated, energetic and an excellent team player focused on creating disruptive technology in the lab. The work requires hands-on process development for protein extraction, purification, and characterization from plants.

Working together to push the boundaries, we blend the best of our talents to unlock innovation. We welcome you to join us in our adventure. Location: Tel-Aviv.

Responsibilities

- Process development for plant protein extraction from bench to pilot scale
- Process development for protein purification process from bench to pilot scale
- Develop and execute all analytical techniques related to protein purification
- Initiate, plan and execute critical scientific research and development projects

Requirements

- M.Sc or Ph.D. in Life Sciences/Bio-Chemical/Biotechnology engineering or related disciplines with at least 2 years of industry experience or post-doc studies.
- Expertise in protein purification process development demonstrated through purification of several types of proteins using a wide range of methods.
- Independently develop new purification protocols, identify and resolve product and production-related issues
- Self-starter and a highly independent individual comfortable to work under pressure and deadlines
- Passionate to perform cutting edge protein science, using advanced laboratory equipment
- Flexibility to work varying schedules and hours as needed according to changing deadlines
